INSIGHTS-DECEMBER 2023 EDITION

National Pollution Control Day - December 2

The month had begun with an important national event, where on December 2 National Pollution Control Day is observed in our country to raise awareness about the different measures to control pollution and the prevention of industrial disasters. This day also reminded us of those who lost their lives in the Bhopal Gas tragedy on 2nd December 1984 and brought awareness about the fatalities caused due to polluted water, land, and air.

This is a month where we also celebrate National Farmers' Day on 23 Dec to honour and acknowledge the contribution of farmers in our lives. Coincidentally, World Soil Day is celebrated on December 5th, aiming to raise awareness of the importance of soil health and the relationship between soil and water in achieving sustainable and resilient agriculture.
